Autism is Treatable

Designed for caregivers &
individuals on the spectrum
preparing for medical visits

Preparing for Medical Procedures

Free video support series

Medical visits can be stressful for anyone. Individuals with autism often face extra challenges during procedures like physical examinations and blood draws due to communication deficits and sensory issues.

Watch these brief presentations aimed at facilitating developmentally appropriate, honest communication.

Social Story:

Today I am getting a blood draw

Running time: 1:03

Caregiver Strategies:

Positioning for Comfort

Running time: 1:42

Easing Patient Anxiety:

Medical Play

Running time: 1:39

This video series was developed by treatment professionals at the Johnson Center for Child Health and Development in collaboration with the Autism Research Institute.
